

Frontend Surfaces and Capabilities

Operator console, shared kiosk, QR poster, and current system scope

OPERATOR

Private live roster

Private live roster and operational controls

KIOSK

Privacy-first employee

Privacy-first employee and visitor actions

POSTER

Printable shared-kiosk entry point

Printable shared-kiosk entry point

SURFACE CAPABILITIES

Compact connection status, current time, employee and visitor counts.

Names, session timing, information review, and clock-out actions stay behind owner access.

Today, Employees, Payroll, Guests, Recovery, Readiness, and Security remain available.

Operator guidance is shown in plain language; technical JSON is download-only.

Local-network application sample - Version 0.9.0

Shared Time Clock Kiosk

A front-and-center employee and visitor surface designed for a shared device.

SURFACE CAPABILITIES

Employee actions

Clock in, clock out, start break, and end break with employee ID and PIN.

Visitor actions

Separate visitor sign-in and sign-out flow without exposing a public visitor roster.

Privacy by default

Private fields clear after each action; only anonymous onsite counts are displayed.

Restricted access

Professional STOP notice defines the intended employee and registered-visitor audience.

The screenshot displays the 'Shared Time Clock Kiosk' interface. At the top, the 'Best Buds TIME CLOCK' logo is on the left, the time '9:09:08 PM' and date 'Friday, July 3, 2026' are in the center, and a 'Live connection' status with 'Anonymous counts only' is on the right. A green bar below the header indicates 'Time clock ready Employee and visitor actions are available.' The main heading asks 'What would you like to do?' with a subtext: 'Choose Employee or Visitor. Your information clears after every action.' A red warning box states: 'STOP — NO UNAUTHORIZED ENTRY BEYOND THIS POINT Access is limited to employees and registered visitors.' Below this are two tabs: 'Employee' (selected) and 'Visitor'. The 'Employee' tab contains fields for 'EMPLOYEE ID' (with placeholder 'Enter your ID') and 'PIN' (with placeholder 'Enter your PIN'), followed by the note 'Both fields are required. Nothing is remembered on this kiosk.' There are four large buttons: 'CLOCK IN' (with a right arrow icon and 'Start work' text), 'CLOCK OUT' (with a left arrow icon and 'End work' text), 'START BREAK' (with a pause icon and 'Pause work' text), and 'END BREAK' (with a play icon and 'Resume work' text). At the bottom, a status bar shows a checkmark icon and the text 'Ready for the next person Choose a mode and complete your action.' The footer includes a checkmark icon and the text 'Your information clears automatically after each action.' on the left, and two visitor counts on the right: 'Employee onsite' and 'Visitor onsite'.

Printable QR Poster

A one-page Letter-size poster that connects phones and shared devices to the kiosk.

SURFACE CAPABILITIES

- **Large scannable QR**

Uses the selected local-network kiosk URL and retains a readable fallback address.

- **Simple instructions**

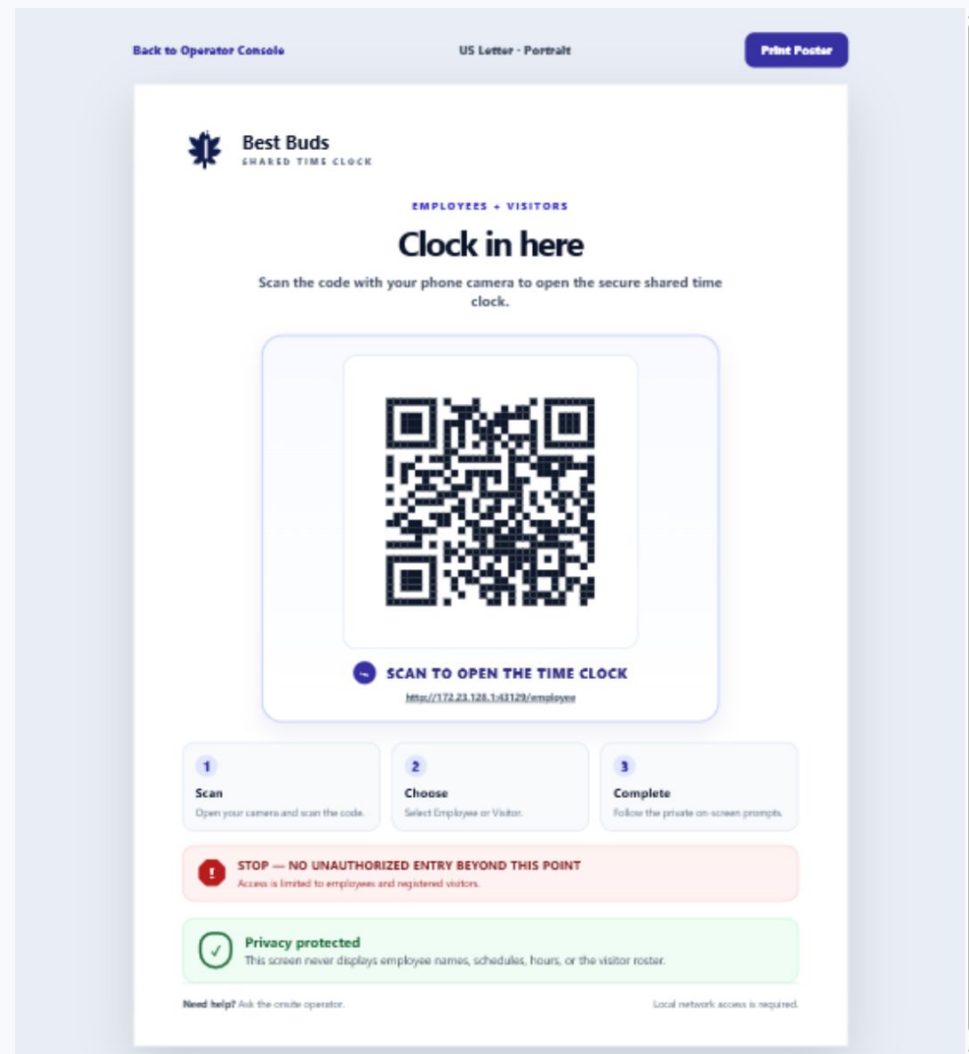

Scan, choose Employee or Visitor, then complete the private on-screen prompts.

- **Optional notice**

The operator can include or omit the restricted-access notice before opening the poster.

- **Print verified**

The current layout renders on one US Letter portrait page with comfortable margins.

Current Capabilities

Implemented surfaces and deliberately stated product boundaries.

CURRENT**Employee + visitor kiosk**

Shared-device workflows with automatic private-field clearing.

CURRENT**Live status transport**

WebSocket updates with authenticated owner polling fallback.

CURRENT**Owner operations**

Onsite roster, clock-out actions, employee administration, and adjustments.

CURRENT**Payroll review exports**

CSV, JSON, Markdown, HTML, and closed-period ZIP packages.

CURRENT**Visitor records**

Separate guest ledger and CSV export; visitor visits never enter payroll totals.

CURRENT**Recovery and evidence**

Offline queue review, audit receipts, backup, and restore dry-run.

Planned next

PLANNED**Formatted Excel outputs**

Separate payroll timesheet and visitor-log workbooks with filters, tables, and print areas.

PLANNED**Selected-period summary PDF**

Owner-facing totals, exceptions, employee summary, and privacy-safe visitor counts.

PLANNED**Unified period report package**

CSV source files, Excel working copies, PDF summary, manifest, and hashes.

PRODUCT BOUNDARIES

Local-network runtime only. No hosted deployment, biometric identity, GPS verification, payroll-provider integration, legal compliance seal, or automatic payroll approval is claimed. Pay and overtime values remain estimates pending owner and payroll review.
